

**Eligible diagnoses to be considered for programs at The Sajni Center at Lucy's Love Bus. *This list is not exhaustive; if your child has another life-threatening illness and would like to be considered, please email Jackie@LucysLoveBus.org***

### **Congenital & Genetic**

- Renal agenesis/dysgenesis, aka "Potter Syndrome"
- Asphyxiating Thoracic Dystrophy, aka "Jeune Syndrome"
- Severe Osteogenesis Imperfecta Epidermolysis Bullosa
- Trisomy 13, aka "Patau's Syndrome"
- Trisomy 18, aka "Edward's Syndrome"
- Rett Syndrome

### **Pulmonary**

- Cystic Fibrosis
- Bronchiolitis Obliterans
- Pulmonary Atresia
- Central hypoventilation syndromes
- Chronic ventilator/CPAP/BiPAP dependence
- Severe asthma

### **Malignant Disease**

- Cancer diagnosis
- Bone marrow/stem cell transplant
- Any newly diagnosed malignant disease with an EFS of <40% with current therapies
- Any relapsed malignant disease
- Metastatic solid tumors
- Neurofibromatosis
- New diagnosis with complex pain or symptom management issues

### **Cardiopulmonary**

- Single ventricle cardiac physiology
- Severe Pulmonary HTN
- Ebstein's Anomaly
- Eisenmenger's Syndrome
- Hypertrophic Cardiomyopathy
- Hypoplastic Left Heart
- Ongoing discussion of cardiac transplant
- Combination of cardiac diagnosis with underlying neurologic/chromosomal diagnosis
- Complex Congenital Heart Disease
- Severe Myocarditis

### **Renal**

- Neonatal Polycystic Kidney Disease
- End-stage Renal Disease
- Renal Failure

### **Neurologic, Neuromuscular, Neurodegenerative**

- Progressive Neurodegenerative Conditions
- Leukodystrophy
- Friedrich Ataxia
- Congenital Hereditary or Progressive Muscular Dystrophy
- Spina bifida
- Retinal dystrophy in systemic or cerebroretinal lipidosis, aka "Batten Disease"
- Brain Reduction Syndromes, i.e. Anencephaly, Lissencephaly, etc.
- Severe Traumatic Brain Injury
- Static encephalopathy
- Severe anoxic brain injury

### **Metabolic**

- Krabbe Disease
- Mucopolysaccharidosis, aka "Hunter's/Hurler's Disease" or "Sanfilippo Syndrome"
- Lipidosis, aka "Niemann-Pick disease" or "Fabry disease"
- Menkes Disease
- Pompe Disease
- Sandhoff Disease
- Mitochondrial disorder
- Severe metabolic disorders

### **Gastrointestinal**

- Multi-visceral organ transplant under consideration
- Biliary atresia
- Total aganglionosis of colon
- Progressive hepatic or uremic Encephalopathy
- Long-segment Hirschprung's
- Short-gut syndrome with TPN

### **Other illnesses considered**

- Lupus
- Lyme disease
- Sickle cell disease
- Clinical depression
- Diabetes
